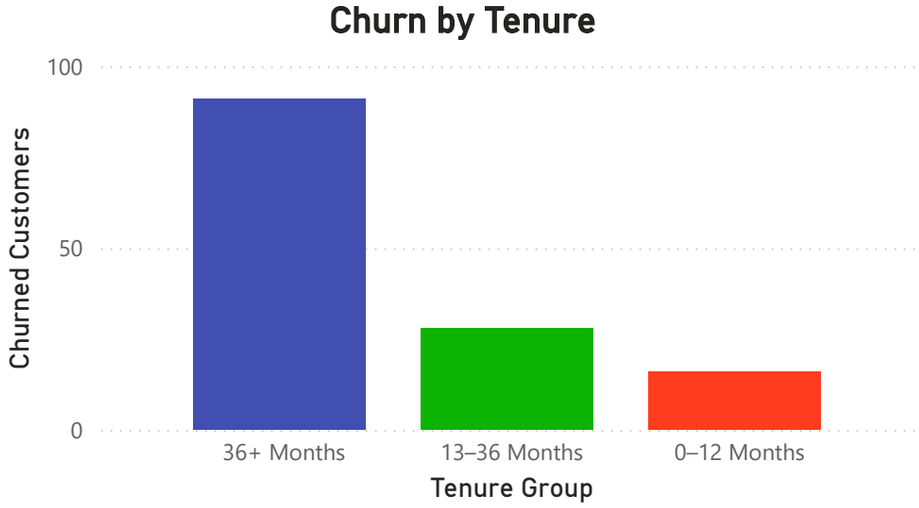
BANK CREDIT CARD CHURN DASHBOARD

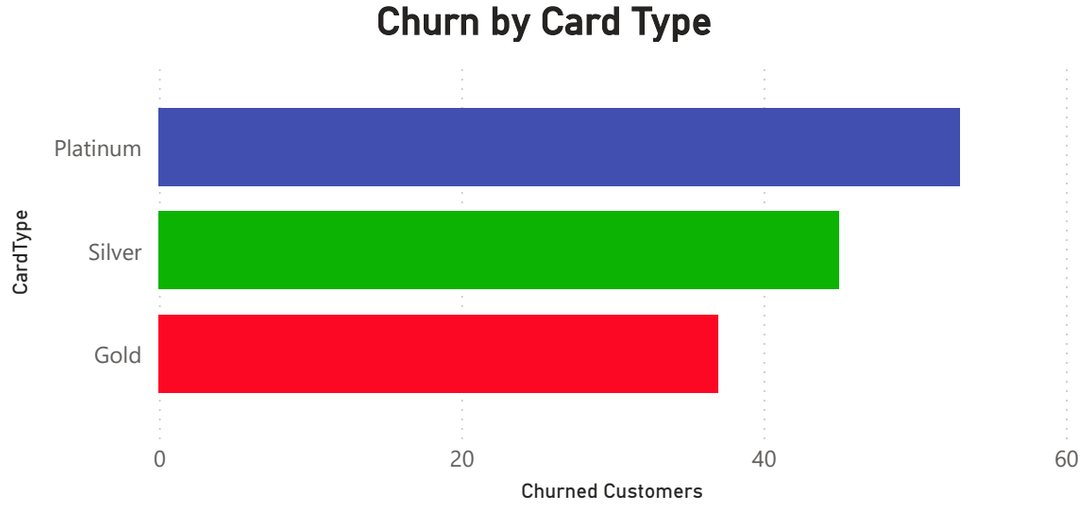
Page 1: Overview

Total Customers	Active Customers	Churned Customers	Churn Rate (%)
500	365	135	0.27

Slicers

- Female
- Male





Key Insights & Recommendations

- **Overall churn rate is 27%, indicating a significant retention opportunity.**
- **Higher churn among long-tenure and premium card customers suggests value expectations are not being met.**
- **Target high-risk segments with loyalty benefits and personalized retention offers to reduce churn.**

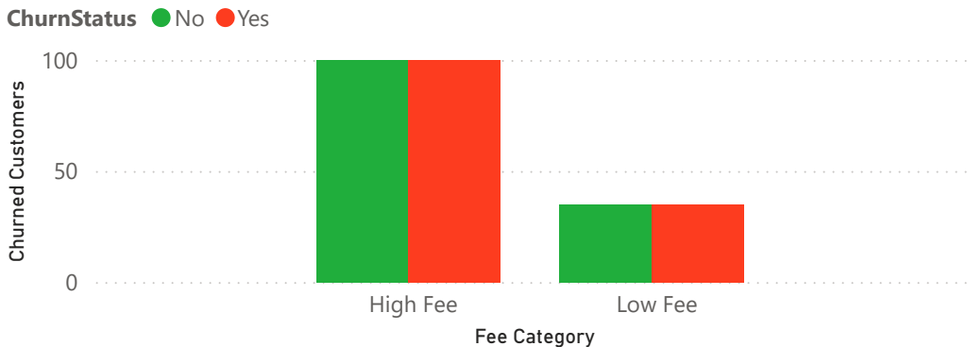
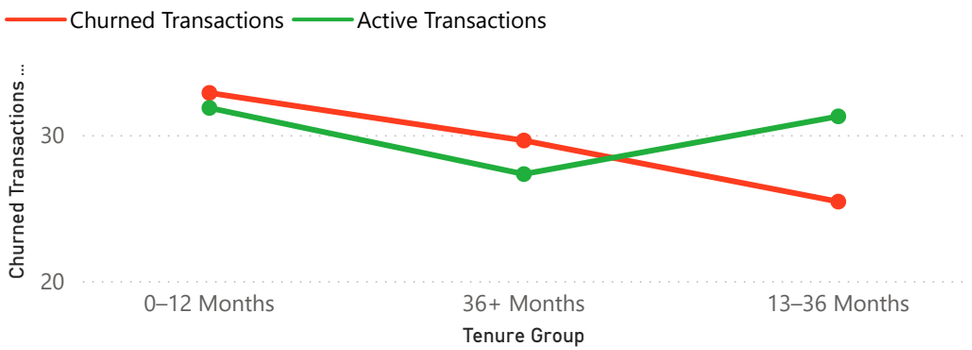
Spend vs Churn

Annual Fee vs Churn



Transactions & Churn



Slicers

- [ ] Female
- [ ] Male

Key Insights & Recommendations

- **Early-tenure, low-spend customers show higher churn → strengthen onboarding and early engagement.**
- **Annual fee alone does not drive churn → focus on improving perceived value over price reduction.**
- **Higher transaction activity aligns with retention → use rewards and usage-based incentives to retain customers.**
